# Hydrostatic Test Pumps QCP 504-392-9464

RICE Hydro... known as the World Leader in the hydrostatic test pump manufacturing and design. With over 40 years of experience, several patents, we have over 50 different models available for pressure testing in the water, oil, gas, construction, plant process industries and many more.

"Built to Suit" special order and custom options are available

"Built to Suit" special order and custom options are available to fit your specific testing needs. Various power options are available with pressures up to 30,000 PSI.

### DP series -

The most versatile hydrostatic test pumps on the market today, the diaphragm series offers high flow rates for speed of test, ability to handle up to a 10% chlorine solution and can be run dry without damage. Flows up to 56 GPM, with pressures up to 600 PSI.

DPH-56/250 · 56 GPM · 250 PSI

# **Accessories**

# Pressure Feed Tanks

The pressure tank assembly, an accessory designed to allow

the force-feeding of diaphragm test pumps.

# Wheel & Handle Kits

Truly the most portable test pumps on the market, RICE makes available an optional sturdy wheel and handle kit.

DPH-8 · 32 GPM · 300 PSI

# TEST PUMP FEATURES

### Inlet Hose

Featuring the superior and most versatile diaphragm series. Unsurpassed in quality and dependability, diaphragm pumps have the ability to handle up to a 10% chlorine solution and be run dry without damage to the unit. The Model DPH-3B, featured below, is the most sought after unit in the market today capable of 11 GPM and pressures up to 550 PSI. An advanced triple diaphragm pump ensures smooth quiet operation, short duty times with an increased life cycle. Highlighted below are some of the "Quality" features on RICE hydrostatic test pumps:

Fully Adjustable to Exact Pressure Setting Required

## Oil Sight Glass

Easily visible to check pump oil level, or cross contamination due to ruptured diaphragms

# **Triple Diaphragm Pump**

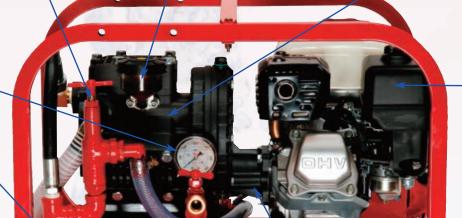

- Run Dry Without Damage
- Handles Chlorine Solutions
- Smooth Operation
- Longer Life

# Stainless Steel Liquid Filled Gauge

- Reduces Flutter
- Ensures Accurate Reading
- Long Life, Never Yellows

### Checkvalve & Ballvalve

- Prevents Pressure Loss
- Controls Water Spikes
- Isolates Test Environment

# **Honda Engine**

- : With Oil Alert
- Worldwide Parts Availability
- Other Power Options Available

# Welded Tubular Steel Frame & Heavy Gauge Steel Base

- Virtually Indestructible
- Designed to Withstand Abuse

## **Outlet Hose**

- 3 8 foot High Pressure Outlet Hose
- Quick Connect Couplings

# **Inlet Diaphragm**

- Prevents Ruptured Diaphragms Caused from Pressure Feedings
- Reduces Costly Repairs, Less Down Time

### **Enclosed Gear Reduction**

- Reduces Wear
- Inner-oil Bath
- Reduces Liability

# Model DPH-3B The Best Test Pump Available 116 lbs.

- Highly Efficient, Triple Diaphragm Unit, Smoother Operation and Longer Life
- Reaches Test Pressure Quickly With 11 GPM Up to 550 PSI
- Reduces Liability No External Moving Parts
- \* Handles up to 10% Chlorine Solutions

# **Pneumatic Series**

HP-Series, pneumatic driven hydrostatic test pumps, available with pressures up to 30,000 PSI. Versatile and compact designs, for testing in small confined spaces or remote locations such as on board ships and oil rigs.

These units have the ability to start/stop while under pressure.

HP-10 · 10,000 PSI

HP-20 · 20,000 PSI

HP-6/500 500 PSI

### STANDARD FEATURES

**100 PSI AIR** - needing only standard shop air.

**ROLL CAGE** - enclosed in a rugged roll cage of heavy gauge welded steel.

**HOSE -** 8' high pressure outlet hose.

**STRAINER** - stainless 100 mesh strainer, for pump protection from debris.

**GAUGE -** stainless steel liquid filled, ensures less flutter.

**VALVE -** high pressure valve for removal of air and pressure release.

MODEL	VOLUME	PSI

# Wheel & Handle Kits

Truly the most portable test pumps on the market, RICE makes available an optional sturdy wheel and handle kit.

# **High Pressure Series**

### **TR Series**

The High Pressure series of gas, electric, or diesel powered units, offering flow rates up to 5 GPM and pressures ranging up to 5000 PSI. The triplex ceramic plunger pump, has an inner oil bath, ensuring long life and increased stability. Units can be "Built to Suit", special order options available.

# TESTERS

FH10-H · 10 GPM · 450 PSI

# FHWA-1

Pressure wand accessory makes your FH-series fire hose tester a year

round contributor to your equipment fleet.

The **FH-series** line of fire hose testers, offers testing pressures up to 1,000 PSI, with flow rates up to 10 GPM. Gas, Electric, and Diesel driven models available, designed to safely test fire hose up to 6" in diameter. A large 2 & 1/2" swivel inlet aids in the ability to quickly fill and bleed the fire hoses through the large 1 & 1/2" heavy duty manifold, with independently controlled stainless steel ballvalves. The

Securement Device

EL-FHT · 3 GPM · 500 PSI

The **LineCage**, a patented design, for safely securing and anchoring your fire hose during pressure testing

# **Shoring Pressure Pumps**

### ST 312

Gas powered hydraulic shoring pressure pump, it's a SHORE-Thing!

Designed for use with bio-degradable anti-freeze the ST-312 offers a 20 gallon tank reservoir, a pressure adjusting valve up to 2000 PSI with bypass relief, and NO flat polyurethane tires.

Pneumatc option available.

# **Manual Test Pumps**

Manually operated test pumps, designed for testing small diameter lines in areas such as: landscaping, plumbing, and residential. A unique dual checkvalve system eliminates water bleed-back during test, greatly reducing operators labor and fatigue.

The series offers three pressure ranges of 500, 1000, or 1500 PSI.

Resevoir tank option available.

# **Piston & Roller Series**

RICE Hydro offers a line of piston or roller pump style hydrostatic test pumps. These are mid-volume, low pressure units designed for testing small diameter water lines, landscaping, plumbing and irrigation type environments. Available with flow rates up to 10 GPM, and pressures up to 450 PSI.
